

The Primary Care Medical Record (PCMR) System

Recommendations for Success from Family Physician Leaders

The OMA, SGFP and OCFP have put forward six practical, physician-informed recommendations to support successful implementation, adoption and long-term sustainability of the Primary Care Medical Record (PCMR) system.

Partner with family physicians in co-design

Maintain patient trust and support digital health literacy

Support family physicians with clear communications and change management resources

Align with clinical workflow

Apply a principled data governance framework

Recognize the value of EMR data
