

OHT Physician Association

The OMA recommends that local physicians and physician groups come together and organize to form one united Physician Association.

Physician Associations will help physicians to influence OHT and decision making, promote and ensure physician leadership within the OHT, and create a forum for discussing clinical and policy issues relevant to their local community.

The Association establishes a unified voice for physicians and allows members to elect or appoint individuals to represent them on OHT Governance Committee/Board.

* Physician Associations may decide to develop committees (e.g. mental health committee, primary care committee, etc.). The Chair of each committee should hold a seat on the Association's Governance Committee/Board.
