Supervising family medicine learners under FHO+

The new FHO+ model recognizes the importance of clinical teaching in Ontario

Training Ontario's future family doctors requires clinical time and resources from Family Medicine supervisors. The new FHO+ model helps support the supervision of trainees to ensure that every person in Ontario has access to the care they need, both now and in the future.

Add personal satisfaction to your workday

Teaching is a great way to give back to the medical community by imparting your knowledge and experience.

New supports are available to support preceptors in family medicine

Paid clinical teaching time for FHO+ physicians via the new Hourly Rate	In addition to regular billings, the new **Hourly Rate of $80/hour** is applicable to time spent teaching including both: • **In the exam room (billed as Q310 - Direct Patient Care - In-Person or Video):** clinical teaching done concurrently with delivering direct patient care • **Case reviews and follow-up (billed as Q312 - Indirect Patient Care):** patient-specific clinical teaching that arises from direct patient care but is not done concurrently This applies to teaching undergraduates, residents and fellows. In addition to billing the hourly rate for time spent teaching, you can also bill the hourly rate for other eligible work you do when you are not teaching.
Increased preceptor funding	The funding increase is from $1,000 to $1,600 per four-week block. This increase will roll out in fiscal year 2026-27.

"I like teaching family medicine residents because they keep me thinking, ask good questions, and remind me why this work matters."
- current preceptor

Help inspire the next generation of family medicine

Reach out to your local medical school to see how you can get involved as a preceptor.
