

**SR. PROGRAMMER ANALYST
TECHNOLOGY
Consulting Contract until December 2019**

We are seeking a talented **Sr. Programmer Analyst** to join our development team. This role is responsible for building, maintaining and supporting OMA's corporate applications. You will be working with a team of in-house programmers and be responsible for full stack development spanning server to front-end HTML development, API development and integration with cloud applications.

RESPONSIBILITIES

- Design, develop and test and implement features in a wide range of application areas including UI, reporting, micro services and API
- Deliver highly tuned, testable and optimized application and database code per spec and be expected to offer alternative approaches when reviewing requirements and stories.
- Collaborate closely with Product Managers, BA, QA and infrastructure teams throughout all phases of the software and product development lifecycle.
- Deliver on-time, unit-testable, high-quality systems that meet the specifications
- Stay current on technology and domain trends, frameworks and industry standards
- Support technical quality of the systems by performing peer code reviews, refactoring, suggesting and implementing architectural improvements, investigating and resolve production issues
- Support the growth of the team by providing mentorship to less experienced team members and leading technical discussions or present on relevant technical topics

REQUIREMENTS

- Undergraduate Degree in Information Technology, Computer Science, Computer Engineering, or equivalent
- Strong understanding and proficient in the following technologies: Angular 2.0+, HTML5, CSS, SCSS, Bootstrap, jQuery, JavaScript, TypeScript, and SOLID OO design principles.
- Nice to have skills: ASP.NET, MVC, MMVC, .NET Core, C#, Entity Framework, SQL, design patterns and RDBMS concepts.
- Excellent written and verbal communication skills
- Exceptional attention to detail
- Ability to effectively work on multiple projects simultaneously and effectively contend with competing priorities
- Possess strong logic, troubleshooting, code optimization and refactoring skills.
- Willingness to share opinions and experiences with team and stakeholders regarding technical topics and approaches
- A minimum of 4 years of experience in full-stack .NET Web Application Development
- Experience building multi-tiered systems with Web-facing aspects
- Experience working with third-party RESTful web services and other APIs
- Experience working with teams using Agile principles
- Familiarity with SOA, microservices architecture and message queueing

Interested candidates should forward their cover letter and resume, quoting "Consultant - Sr. Programmer Analyst" in the subject line, to the Human Resources Department at hr@oma.org by **March 20, 2019**.

Ontario Medical Association is an equal opportunity employer. We will accommodate your needs under the Ontario Human Rights Code.
