

SOFTWARE PROGRAMMER TECHNOLOGY

Are you looking to expand your skills and be part of a talented team? Are you respectful, bold, responsive and transparent? Are you an innovative go-getter who becomes energized working in a challenging, team-oriented environment with a passion for those in healthcare? Then join the Ontario Medical Association.

The Ontario Medical Association (OMA) advocates for and supports doctors, seeking to strengthen their leadership role in caring for patients. We continually seek to be the trusted voice in transforming Ontario's health care system by courageously pursuing best practices, new ideas, solutions and opportunities to improve.

The **Programmer Analyst** role is responsible for building, maintaining and supporting OMA's corporate applications. You will be working with a team of in-house programmers, and be responsible for full stack .NET development spanning server to front-end HTML development, API development and integration with cloud applications. Candidates should also be open-minded to alternate technologies and platforms and enjoy experimenting with new technologies and stacks.

Responsibilities:

- Design, develop and test and implement features in a wide range of application areas including UI, reporting, micro services and API;
- Deliver highly tuned, testable and optimized application and database code per spec and be expected to offer alternative approaches when reviewing requirements and stories;
- Collaborate closely with Product Managers, BA, QA and infrastructure teams throughout all phases of the software and product development lifecycle;
- Deliver on-time, unit-testable, high-quality systems that meet the specifications;
- Stay current on technology and domain trends, frameworks and industry standards;
- Support technical quality of the systems by performing peer code reviews, refactoring, suggesting and implementing architectural improvements;
- Support and maintenance of web applications by investigating and resolving production issues.

Our Offer

- Fantastic opportunity to grow with the team and shape the strategic direction of the company
- Paid professional development
- Friendly and dynamic work environment
- Competitive salary and group benefits package

Skills and Experience:

- Bachelor's Degree in Computer Science preferred;
- Excellent written and verbal communication skills;
- Ability to effectively work on multiple projects simultaneously and effectively manage competing priorities;
- Possess strong logic, troubleshooting, code optimization and refactoring skills;
- Willingness to share opinions and experiences with team and stakeholders regarding technical topics and approaches;
- A minimum of 2 years of experience in full-stack .NET Web Application Development;
- Strong proficiency in the following technologies: Angular 2.0, ASP.NET, MVC, MMVC, jQuery, C#, SQL;
- Experience building multi-tiered systems with Web-facing aspects;
- Experience working with third-party RESTful web services and other APIs;
- Experience working with teams using Agile principles;
- Familiarity with SOA, microservices architecture and message queueing.

Interested candidates should forward their cover letter and resume to the Human Resources Department at hr@oma.org quoting "Programmer Analyst" in the subject line.
